

Jessica Haynes

Brighton, MI | jkhaynes2390@gmail.com | linkedin.com/in/jesshaynes | jessbuilds.dev

PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience designing and delivering full-stack enterprise applications. Highly skilled in .NET, C#, MySQL, and Angular with a strong focus on backend performance optimization and scalable architecture. Experienced team lead known for driving modernization initiatives, mentoring developers, and integrating AI-driven workflows to improve team efficiency and promote test-driven development.

TECHNICAL SKILLS

Languages & Frameworks: .NET, C#, ASP.NET Web API, Entity Framework, LINQ, Angular (2+), AngularJS, TypeScript, JavaScript, HTML5, CSS, SQL Server, MySQL

Architecture & Practices: RESTful API Design, Microservices, Domain-Driven Design (DDD), Repository Pattern, Dependency Injection, SOLID Design Principles, OAuth2/JWT Authentication, Swagger/OpenAPI, Identity & Access Management (SSO, SAML, OIDC)

Testing & Quality: Test-Driven Development (TDD), Unit Testing (xUnit, NUnit, MSTest), Frontend Testing (Jest), Agile/Scrum, CI/CD (Azure DevOps, GitHub Actions)

Cloud & DevOps: Azure, AWS, Docker, MongoDB, Git, Application Insights, Serilog, Datadog, Veracode

Database & Performance: Stored Procedures, Query Optimization, Database Performance Tuning

Tools & Platforms: Visual Studio, VS Code, SQL Server Management Studio, GitHub, Jira, Bitbucket

AI-Assisted Development: Claude Code, GitHub Copilot, Codex, Agentic Coding, Prompt Engineering

PROFESSIONAL EXPERIENCE

Senior Software Developer IV / Team Lead, 8AM

January 2024 – Present

Remote

- Lead developer on a cross-functional team of four engineers, collaborating with Product, QA, and DevOps to design and deliver robust, scalable solutions.
- Achieved 6+ months of incident-free production and reduced support escalations by 50% by championing improvements in testing, logging, and observability.
- Reduced nightly background-job runtime by 95% by replacing repeated external lookups with batched retrieval and in-memory matching.
- Drove unit-test coverage from 53% to 89% by leading four engineers through a targeted testing initiative and enforcing CI gates that block releases on any failing test.
- Spearheaded an initiative to integrate AI into the development process, improving team efficiency, code quality, and adoption of test-driven development.
- Authored technical specifications, triaged production issues, and mentored developers through pair programming and detailed code reviews.

Senior Software Developer III, 8AM

March 2022 – January 2024

Remote

- Worked across the full stack with a focus on backend development using .NET, C#, MySQL, Entity Framework, and Angular.
- Designed and led implementation of enterprise SSO, enabling customers to securely authenticate through their existing identity providers.
- Improved onboarding for QA and developers by overhauling documentation and establishing clearer project standards.

Lead Developer, Proplanner.net

January 2020 – March 2022

Ames, IA / Remote

- Designed, developed, and supported an identity and access management service using C# and .NET.
- Configured and supported SAML- and OIDC-based identity provider connections for all clients.
- Oversaw a team of engineers to reduce the total amount of security flaws by 81% across all Proplanner applications.
- Designed and developed security features across applications including audit tracking and user timeouts.

- Engaged with clients to collect specifications for new features and resolve deployment issues.
- Mentored a team of four interns resulting in their seamless integration and valuable contributions to project deliverables.

Senior Software Engineer (Team Lead), Growers Edge

February 2019 – January 2020

West Des Moines, IA

- Served as tech lead on multiple projects, taking responsibility for defining project design, assigning tasks to developers, and meeting project deadlines.
- Collaborated with product owners to identify potential problems and recommended alternative solutions.
- Trained and mentored junior programmers in programming methodologies and best practices.
- Designed and implemented new features using .NET and Angular 7 in an agile environment.
- Worked with Azure cloud services to build, manage, and deploy applications.

Senior Software Developer, Proplanner.net

December 2017 – February 2019

Ames, IA

- Supported a 200% increase in customers by leading a live, zero-downtime migration of a manufacturing shop-floor app from AngularJS to modern Angular.
- Collaborated with application engineers to gather user requirements and design solutions to everyday manufacturing problems.
- Prioritized and assigned tasks to a small team of developers.
- Wrote detailed design documents with time estimates for incoming projects.
- Provided technical advice on bugs and enhancements to other team members.
- Decreased time spent on support by creating a program to help automate the build process.

Programmer, Proplanner.net

May 2016 - December 2017

Ames, IA

- Developed and tested features for a .NET Windows Application.
- Interfaced with 3rd party applications and services.
- Helped debug and resolve critical software issues with rapid turnaround.

EDUCATION

Bachelor of Science in Computer Science — Iowa State University | Ames, IA | 2016
